

Your Parish Council wants to hear from you!

The vision of the Parish Council is to be the voice of the residents and improve the quality of life for the entire community

The Parish Council is directly funded by you (the Parish Council Precept and you will see this on your Council Tax Bill) so it is important to the Councillors that you are getting a good service from your Council!

We are looking at more ways to make the Parish Council a more relevant/useful organisation within our community and it wants your thoughts and ideas please.

Some of the things we are working towards:

- to recognise the needs and aspirations of the community
- to work with residents and community groups and support them in appropriate local developments
- to use the Council influence where possible to shape the future services and development of the Parishes
- to ensure future planning applications reflect and meet the long term challenges in the area
- to increase biodiversity in the parishes
- to do whatever we can to reduce the carbon footprint of the parishes and adapt to climate change
- to improve the footpath, bridleway and cycling network

Have we missed anything?
